

Infinity Fiber is proud to design and manufacture fiber optic Launch Boxes designed for use with OTDR's made with harsh environment water-proof Pelican cases.

Launch Boxes

Our launch boxes are used for testing with OTDR's to eliminate "dead zones" caused by connector interfaces that make breaks, shatters, bends and other anomalies undetectable without a sufficient distance launch.

Launch boxes are vital to the success of OTDR testing and are available in 300m, 500m and 1km lengths and 2-foot 2mm leads, (longer leads available upon request).

Infinity Fiber's cables are **Made in the USA.**

All cables are backed by a 100% guarantee to meet or exceed current industry standards.
