

Infinity Fiber is proud to design and manufacture world-class fiber optic cable assemblies for the telecommunication industry.

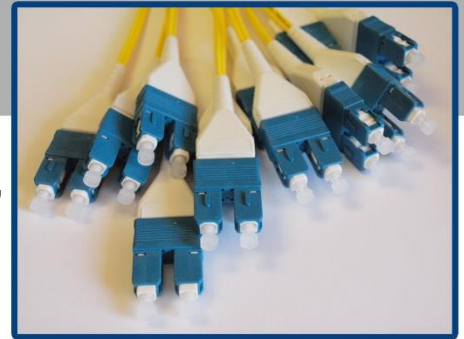

Trunk Cables – Our high fiber count (12-144 and 288 strand) trunk cables can be terminated with any fiber optic connector currently available on the market, including but not limited to LC, SC, ST, FC, MU, MTP, MT-RJ, LCAPC, SCAPC, FCAPC, and SMA. Our fast, reliable and cost effective trunk solutions incorporate Corning optical fiber and high quality components for a plug and play solution right out of the box. Pigtail assemblies are also available in any fiber count and configuration.

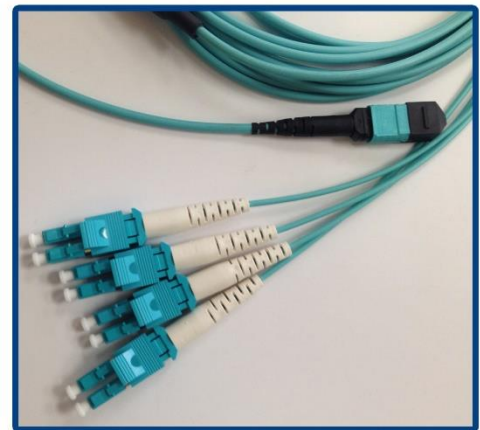

Telecommunication Fiber

We offer indoor, outdoor, armored, direct burial, aerial, and harsh environment cable types for all telecom fiber configurations. Infinity Fiber's cables have been used by some of the biggest names in the industry including Verizon, Microsoft, the NFL and NBC!

Infinity Fiber also offers custom USA patch cords that transition from trunk cables to equipment to maintain a true USA solution from start to finish. American made simplex cables are available for fusion splicing into existing backbone infrastructures. Our patch cords are made using Corning fiber and high quality components. Other top brand manufacturer components are available upon request.

Infinity Fiber's cables are **Made in the USA.**

All cables are backed by a 100% guarantee to meet or exceed current industry standards.
